

January 21, 2026: Documenting the Ongoing Use of Sound Agitations to Notify Me of the Spying Presence of the Trump Team

Tonight, twice at two distinctly recordable moments, the spying team that is operating our USA government notified me that my work is being monitored in real time and that my life is being subjected to the over-lording over-extension of a government that has accepted no self-imposed boundaries.

The first example began as soon as I opened the work for Sign 55 - Thick which is Symbolically discussing the use of authority and decisiveness to bring about trials and punishment. The moment that I opened up that file to begin my work, first responder sirens began blaring nearby and continued through the time period that I worked on that sign.

The second example, now prompting me to make a record of their intrusive spying campaign over my life at 2:20 a.m. is the use of a very loud train horn to mark the opening of the file for Sign 54, Wedding Oneself to God.

There are two possible reasons for the loud train horn being signaled at this moment. One is more likely and has already been mentioned and the second is distinctly related to the task at hand.

First, the Sign of Wedding Oneself to God has been an ongoing reason for their spying operation to send acoustic agitation into my home because they are constantly representing themselves as a 'god' over my life. I am absolutely serious when I inform you that the administration that is in office at this time is asserting themselves as the god of the world and they are emphatic about pushing this impression over my work at all times. According to their sadistic personality disorders, I am not allowed to have my own God, because they are the god that rules over us as their subjects and slaves.

Second, and related to the work that I was immediately producing, I was adding the symbols themselves in a series from Signs 47 - 54, and when I opened Sign 54, the two symbols that I was adding from every other file between 47 and 53 were not present in Sign 54. This also prompted a very loud train horn to sound nearby.

Whether the message produced is one, both, or either of the two, I do not care. The point of this recording is simple. I am being maniacally spied upon by the government now as the government is attempting to engage with me every single day through the use of engine noises, train horns, and other loud acoustic agitations that are meant to 'send me a message' in a manner that is so repetitive and symbolically clear that it cannot be ignored or attributed to coincidence - no matter what they will eventually argue in court.

As the lesson states in Sign 55, trials should not be delayed and noble people should bring about trials with decisiveness and authority to drive out what is vile and bad.

I have made a strategic calculation to continue absorbing this abuse on a daily basis in order to add believability to this outrageous conduct and to maximize my chances of having a court review this case without the duress of the Trump team's abusive conduct.

I promise you. I will file this lawsuit and bring this matter to a court of law - and I will do so without any unnecessary delays. Unfortunately, this current delay is necessary and proper for the particular circumstances of the moment.
